What is this?

Nice? Thanks that's GIMP art from me ;)

It's an image!

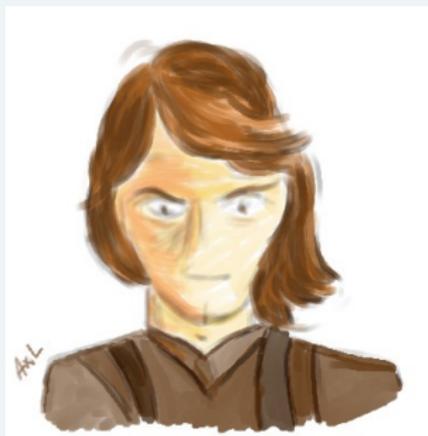

file says...

It is more than that!

Valid PNG

AES Decrypt

Valid Android Package (APK)

Embed this “PNG” in an Android app?

Imagine...

...if that PNG/APK is malicious!

- ▶ (Nearly) invisible to reverse engineering!
- ▶ The Android app is **encrypted**

Arg! What will I see?

- ▶ A **fat** image
- ▶ The wrapping application
 - ▶ Code that decrypts an asset
 - ▶ Code that loads/installs an application

But that depends how well the wrapping app is written
It can be *obfuscated*...

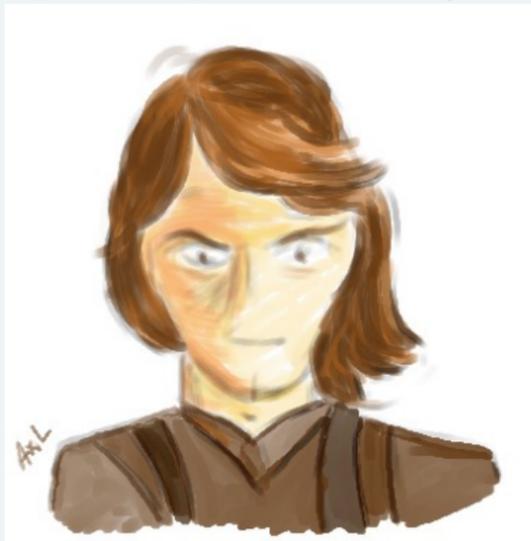

Party time!
Demo!
Wake up!

The APK looks genuine

Payload gets
executed

How do we do that?

1. We write a payload APK

How do we do that?

1. We write a payload APK
2. We encrypt it using AngeCryption: it looks like a valid PNG
 - ▶ We modify (slightly) the APK - Android does not see the change
 - ▶ We modify (slightly) the PNG - our eyes can't see the change
